DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regards to claim 21, line 1, "the method of selecting a web transporting roller" roller is vague and indefinite. What other method steps are being inferentially claimed? Are applicants inferentially claiming a web? Are applicants inferentially claiming feeding of a web or just tensioning a stationary web? What is the intended use of the selected roller? Are applicants inferentially requiring that a vacuum be present to produce the outgassing pressure in the web? Is the web transporting roller rotating being rotated with the web? Further, what is the claimed relationship between the surface roughness of the transporting roller and the web outgassing pressure?

Claim 21 recites the limitation "the average surface roughness" in line 7. There is insufficient antecedent basis for this limitation in the claim. Suggestion: an average surface roughness.

Allowable Subject Matter

Claim 21 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 3654

Claims 22-24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
